

How to view dbell HD Live in a Browser

If you know the IP address, Type the dbell Live IP address on the Browser's address bar with Port number 81. For example, if the IP address of the dbell is 192.168.1.70, in the address bar Type `http://192.168.1.70:81`

1: Download and install '**Search Tool**' from <http://support.dbell.ca/download/hdlive/>

2: Open **Search Tool** application. Search Tool will find dbell HD live on your Network.

On the device section, you will see your dbell. 'Press Refresh' if nothing is visible

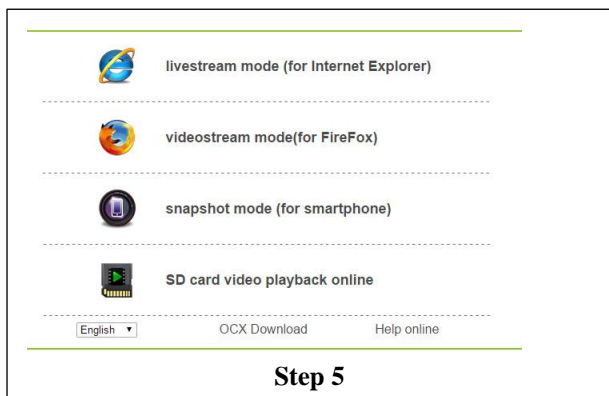

Step 2

Step 3: Double click on **dbell IP address**. It will open in your *default browser*.

Step 4: When asked for Authentication, enter **user name:** admin, and the **password**. If you haven't set any password, default password is blank (no password).

Step 4

Step 5

Step 5: Select a browser to view dbell
